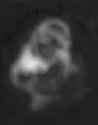
HANDBOOK OF SELECTED STATISTICS ON SASKATCHEWAN TRADE (1991)



Saskatchewan
Spirit of Success

92-00672/

FOREWORD

The Handbook of Selected Statistics on Saskatchewan Trade (1991 edition) has been compiled to present in one volume a detailed historical measure of Saskatchewan exports to the world. The Handbook is a compilation of Statistics Canada data and provincial data on exports laden or produced in Saskatchewan.

This volume of the Handbook presents, for the first time, historical data organized according to the Harmonized System of Tariff Nomenclature (HS codes) for the years 1988 to 1990. Statistics Canada first produced data using the HS codes in 1988. Prior to 1988, data were compiled using the Export Commodity Classification (XCC). Previous editions of the Handbook published data for 1981 through 1987 strictly according to XCC.

Statistics Canada exports reflect province of origin except for uranium statistics. Uranium exports are an exception because the Statistics Canada data measure the exports of radioactive material mostly comprised of uranium hexafluoride (UF_6) processed in Ontario. To correct the difficulty, figures on the export sales of Saskatchewan uranium oxide (U_3O_8) have been collected from the Saskatchewan Department of Energy and Mines. Uranium data are not shown annually for individual countries because of the sensitivity of the figures but data are included in the commodity data report.

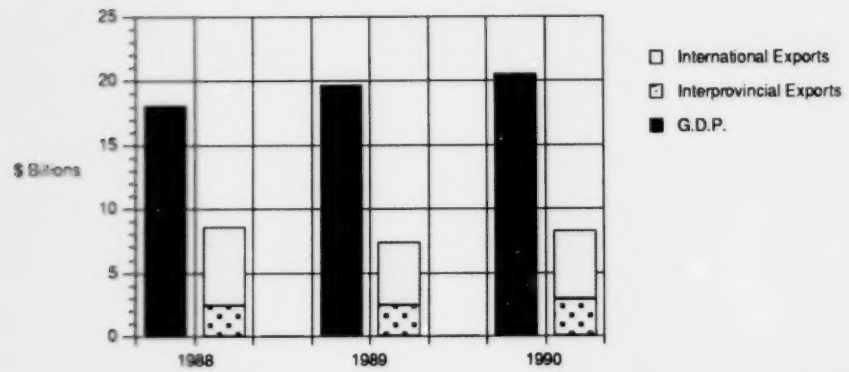
Trade, A Saskatchewan Success Story

International export trade is of vital importance to Saskatchewan. Our economy relies heavily on sales of renewable and non-renewable resources. Saskatchewan's total economic output is about $20 billion a year. Exports to the rest of Canada and international markets account for roughly one-third of this total. The table below shows how international exports compare with provincial Gross Domestic Product (GDP).

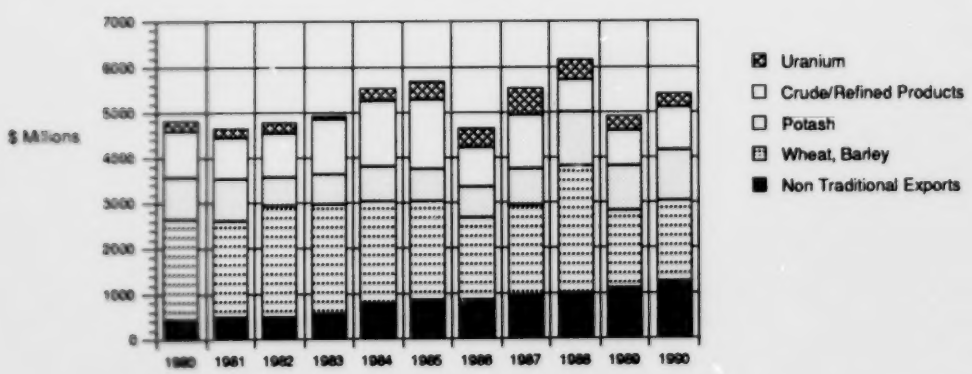
Saskatchewan's G.D.P. Trend & Exports to the World



Source: Sask. E.D. & T. and Sask. Bureau of Statistics

Saskatchewan easily produces more products than it can consume each year. For that reason we depend on trade to keep our economy strong. Export markets are a necessary outlet for our wheat, potash, crude oil, uranium and a vast array of manufactured products including processed foods. Below we see how Saskatchewan's exports have diversified in recent years by adding more "non-traditional" products while maintaining our traditional export product mix of resource-based commodities.

Saskatchewan's International Exports

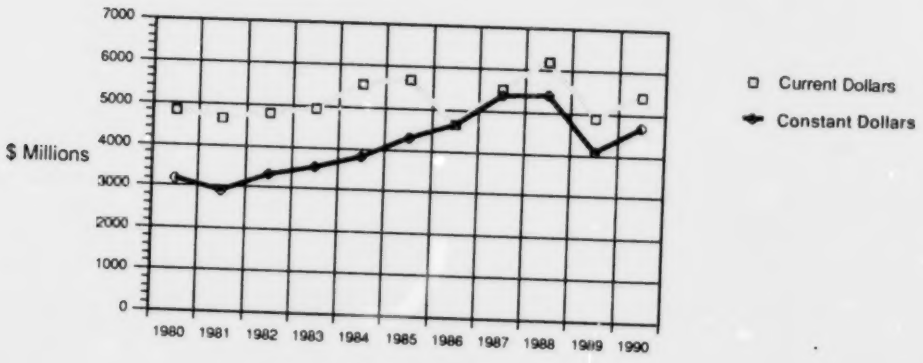


Source: Sask. E.D.& T.

In recent years Saskatchewan exports have been subjected to a variety of negative factors ranging from drought to unfair competition for markets. International grain subsidy wars caused price reductions for cereal grains and fierce competition among exporting nations. Mineral resource prices fell. These factors, combined with a high Canadian dollar further limited exports from this country. When we remove the effects of price change and account for inflation, we see that Saskatchewan exports have significantly grown in volume terms in 1990.

Saskatchewan International Exports

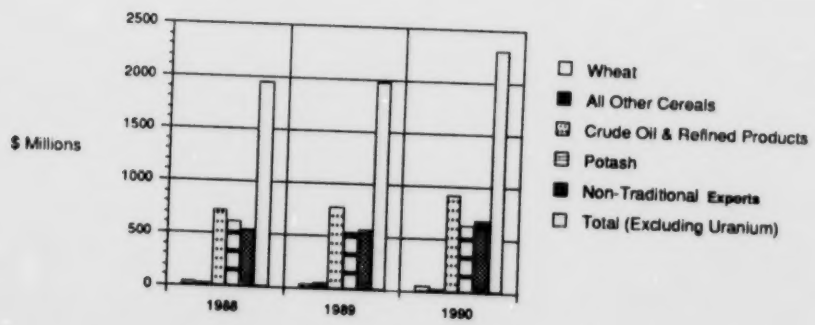
Current Dollars & 1986 Constant Dollars



Source: Sask. E.D. & T. and Sask. Bureau of Statistics

Saskatchewan is committed to building stronger export trade by increasing the number and volume of traditional and non-traditional exports and opening new international markets. The province strongly supported the negotiation of the Canada-United States Free Trade Agreement (FTA) as a way to open and secure markets for our products there. Critics of the FTA argue that the agreement has not benefited Saskatchewan and that trade with the United States has not increased to our benefit. The table below shows that Saskatchewan exports to the United States increased by 18.2 percent since the FTA took effect. What's more, non-traditional products increased by 24.9 percent in the same period.

Comparisons of Saskatchewan Exports to the U.S.
Selected Commodities Exported
(1988 to 1990)



Source: Sask. E.D. & T.

Non-traditional exports include specialty crops such as lentils, peas, lupins and beans but also include manufactured goods such as street sweepers, oilfield equipment, steel products, agricultural implements, processed foods, beverages, telecommunications and data processing equipment, and other products.

There have been trade disputes between Canada and the United States since the beginning of the FTA. The FTA was not intended to remove either country's ability to enforce its trade laws. However, as has been shown recently with the ruling by the Extraordinary Challenge Committee in the case of Canadian exports of fresh, chilled and frozen pork, the dispute settlement provisions of the FTA are working. Without the FTA, Canada's exports of pork and potentially any other product could be seriously impaired. Now, as a result of this ruling, Saskatchewan producers and processors will benefit by the removal of a countervailing duty on pork exports and open market access to the United States fully restored.

Negotiated trade agreements serve Saskatchewan's long term interests. North America remains our largest market and the FTA guarantees access to the United States market of 250 million people. The proposed North American Free Trade Agreement (NAFTA) involving Canada, the United States and Mexico also holds great promise for our economy and adds another potential 80 million consumers of Saskatchewan products. Under NAFTA, we will be seeking expanded markets and opportunities for Saskatchewan food and technology exports in Mexico.

Saskatchewan International Exports by Region (1990)

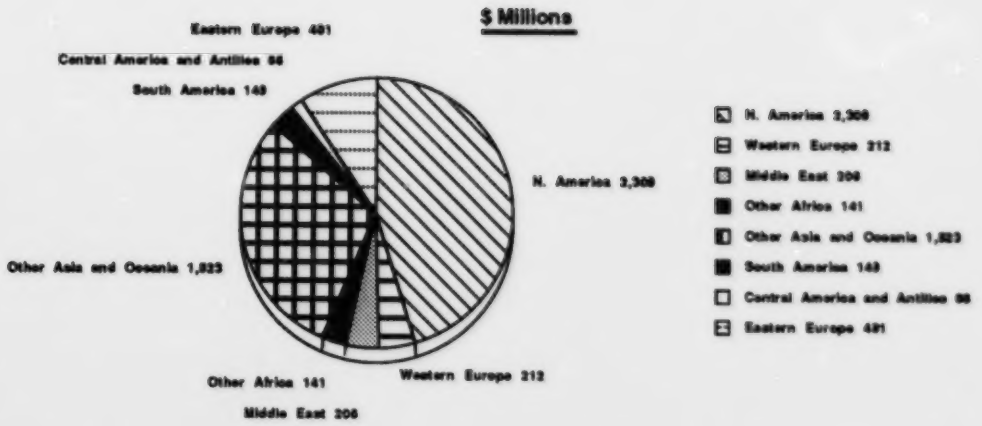
Errata to Saskatchewan International Exports by Region (1990)



Source: Sask. E.D.&T.

Eastern Europe was inadvertently omitted from this chart.
The corrected chart appears above.

The General Agreement on Tariffs and Trade (GATT) Uruguay Round of multilateral trade negotiations holds potential for significant improvements to trading conditions for Saskatchewan products and producers. Under GATT we are striving for improved market access conditions for many of our products in addition to better rules to restrict unfair export subsidies by countries like the United States and the European Community.

Saskatchewan Economic Diversification and Trade is proactive in promoting non-traditional products and developing export markets. The chart below shows a few of the potential growth areas for Saskatchewan exports.
